# Small home appliances security SYSTEM

Shop exposure is not just tablets and smartphones, which have regular symmetrical shapes, due to which the arrangement of shelves is not a major challenge. Secures and exposures are also relevant for devices of home appliances category - dryers, toothbrushes, shavers of irregular shapes and unusual dimensions. For this reason, we created more developed versions of our basic products, higher versions of which effectively secure and expose irregular products.

## Product Features:

- secures moving parts with a discreet sensor
- a sensor provides flexible composition of exposure
- a velcro allows for additional mechanical security
